Create flask:

The image shows a Visual Studio Code editor window. On the left, the Explorer sidebar shows a project named 'FLASK' with files '__pycache__', 'app.py', and 'flask - Shortcut.lnk'. The 'app.py' file is selected. The main editor area shows the code for 'app.py' with line numbers 1 through 7. The code imports Flask, creates an app instance, and defines a route for the root path that returns 'Hello World' in HTML.

```
1 from flask import Flask
2
3 app=Flask(__name__)
4
5 @app.route("/")
6 def hello_world():
7     return "<p>Hello World</p>"
```

Run flask:

The image shows a terminal window with the following output:

```
C:\Users\91638>cd C:\IBM\flask
C:\IBM\flask>flask run
* Debug mode: off
WARNING: This is a development server. Do not use it in a production deployment
* Running on http://127.0.0.1:5000
Press CTRL+C to quit
127.0.0.1 - - [23/Oct/2022 10:52:31] "GET / HTTP/1.1" 200 -
127.0.0.1 - - [23/Oct/2022 10:52:31] "GET /favicon.ico HTTP/1.1" 404 -
```

Output
